1.6.1.2 DVR device parameters set up :

The screenshot shows the 'Add' screen for a DVR device. At the top, there are radio buttons for 'DX-DVR', 'DVR' (which is selected), and 'Vehicle'. Below these are other options: 'IPCam', 'NK-NVR', 'PC200', 'LEX', and 'NK100'. The form fields are: 'Host Name' (empty), 'Host Addr.' (empty), 'Media Port' (9000), 'Account' (empty), 'Password' (empty), and 'Channel' (8).

1. Host Name : It can set up device name.
2. Host Addr. : Insert DVR IP or Domain.
3. Input DX-DVR media port Preset value: 9000.
4. Account : Input DX-DVR Account name.Preset value : Leave blank(If no setting value set up).
5. Password : Input DX-DVR setting password.Leave blank if there is no set up value.

It will be back to device list when all the settings are done and "Return" button of mobile is pressed.

1.6.1.3 Vehicle device parameters set up:

The screenshot shows the 'Add' screen for a Vehicle device. At the top, there are radio buttons for 'DX-DVR', 'DVR', and 'Vehicle' (which is selected). Below these are other options: 'IPCam', 'NK-NVR', 'PC200', 'LEX', and 'NK100'. The form fields are: 'Host Name' (empty), 'Host Addr.' (empty), 'Media Port' (24680), 'Account' (empty), 'Password' (empty), and 'Channel' (4).

1. Host Name : It can set up device name.
2. Host Addr. : Insert 3G Server IP or Domain Name.(Example : 3G Server Domain Name in Taipei: taipei3g.mobilekore.com)
3. Media Port : Insert Vehicle media port. Preset value: 24680
4. Account : Input 3G Server account name.(Example : Demo bus)
5. Password : Input 3G Server setting password.(Example : Demo 123456)

It will be back to Vehicle device list when all the setting are done and "Return" button of mobile is pressed.

1.6.1.4 IPCam device parameters set up:

The screenshot shows the 'Add' screen in the mobile application. At the top, there are radio buttons for device types: DX-DVR, DVR, Vehicle, IPCam (selected), NK-NVR, PC200, LEX, and NK100. Below the device type selection, there are several input fields: 'Host Name' (empty), 'Host Addr.' (empty), 'Media Port' (80), 'Account' (admin), 'Password' (empty), and 'Channel' (1).

1. Host Name : It can set up device name.
2. Host Addr. : Insert IPCam IP or Domain Name.
3. Media Port : Input IPCam media port.Preset value : 80
4. Account : Input IPCam account name. Preset value : admin
5. Password : Input IPCam setting password.Preset value : Leave blank(If no setting value)

It will be back to Vehicle device list when all the setting are done and "Return" button of mobile is pressed.

1.6.1.5 Introduction displaying of adding NK-NVR (Support NK300/NK360/NK700)

The screenshot shows the 'Add' screen in the mobile application. At the top, there are radio buttons for device types: DX-DVR, DVR, Vehicle, IPCam, NK-NVR (selected), PC200, LEX, and NK100. Below the device type selection, there are several input fields: 'Host Name' (empty), 'Host Addr.' (empty), 'Media Port' (80), 'Account' (admin), 'Password' (empty), and 'Channel' (16).

1. Host Name : It can set up device name.
2. Host Addr. : Input NVR IP or Domain Name.
3. Media Port : Input NVR Media port. Preset value: 80
4. Account : Input NVR account name.
5. Password : Insert NVR setting password.Preset value: Leave blank(If no setting value)

It will be back to Vehicle device list when all the setting are done and "Return" button of mobile is pressed.

1.6.1.6 PC200 device parameters set up:

The screenshot shows a mobile application interface for adding a device. At the top, there are radio buttons for selecting a device type: DX-DVR, DVR, Vehicle, IPCam, NK-NVR, PC200 (which is selected), LEX, and NK100. Below the selection area, there are several input fields: Host Name (empty), Host Addr. (empty), Media Port (5566), Account (empty), Password (empty), and Channel (16).

1. Host Name : It can set up device name.
2. Host Addr. : Input PC200 or Domain Name.
3. Media Port : Input PC200 Media port. Preset value: 5566
4. Account : Input PC200 account name.
5. Password : Input PC200 setting password. Preset value: Leave blank(If no setting value)

It will be back to PC200 device list when all the setting are done and "Return" button of mobile is pressed.

1.6.1.7 LEX device parameters set up:

The screenshot shows a mobile application interface for adding a device. At the top, there are radio buttons for selecting a device type: DX-DVR, DVR, Vehicle, IPCam, NK-NVR, PC200, LEX (which is selected), and NK100. Below the selection area, there are several input fields: Host Name (empty), Host Addr. (empty), Media Port (5577), Account (admin), and Password (masked with dots).

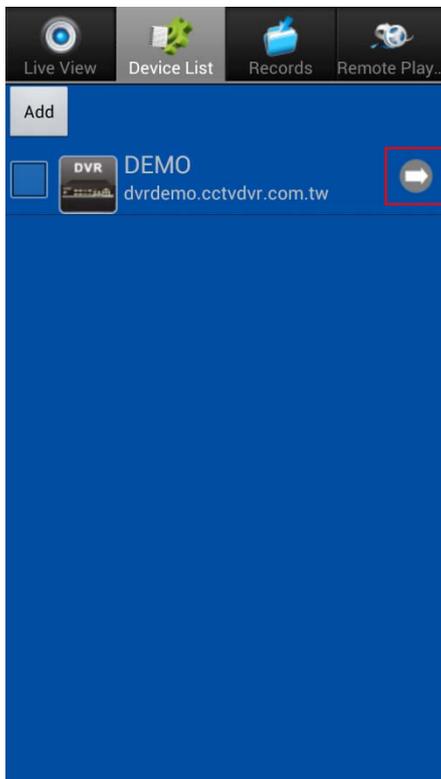

1. Host Name : It can set up device name.
2. Host Addr. : Input LEX IP or Domain Name.
3. Media Port : Input Lex media port. Preset value: 5577
4. Account : Input LEX account name. Preset value : admin
5. Password : Input LEX setting password. Preset value: Leave blank(If no setting value).

1.6.1.8 NK100 device Function:
(Support NK100/NX180)

1. Host Name : Device Name set up.
2. Host Addr. : Insert NK100 IP or Domain.
3. Media Port : Insert NK100 media port
Preset value : 34567
4. Account : Insert NK100 Account name.
Preset value : admin ◦
5. Password : Insert NK100 password
Preset value: Leave blank(No setting value)

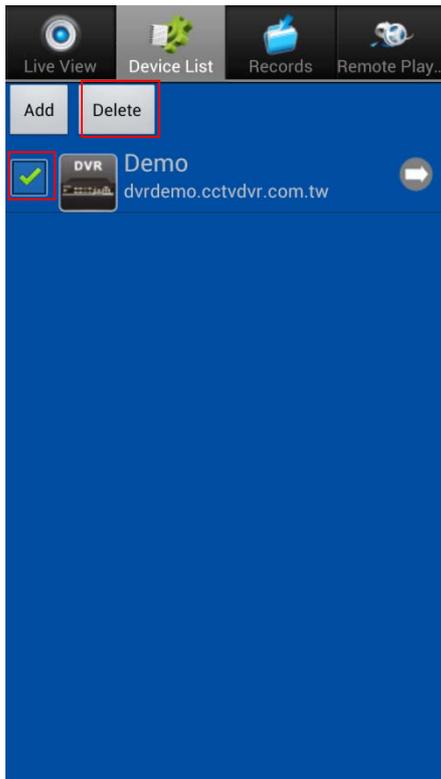

Setting values of NK100 will automatically be saved in the device list and "Return" is selected for completion.

1.6.2  Modification : Modify settings device list.

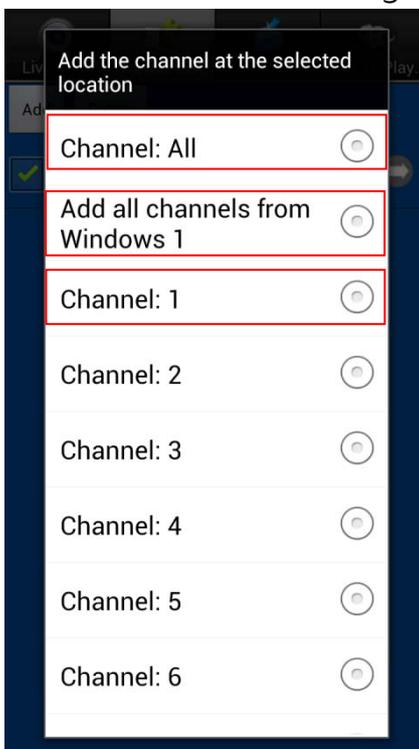

After modifying device setting and press "Return" button, all the setting values will be saved and back to the device list page.

can show it 's current location.

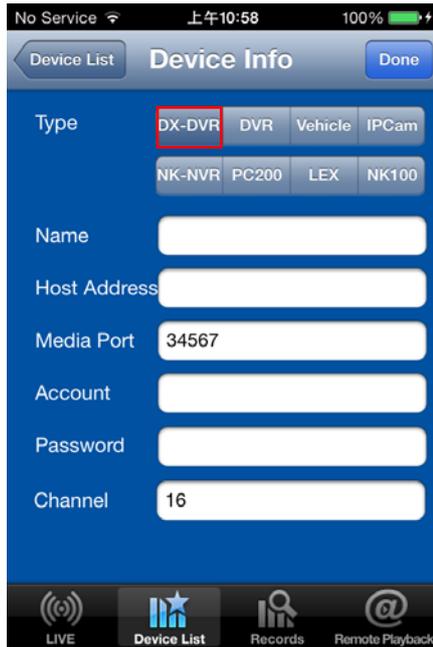

2.5 Device List

Add/ Change Device setting.

2.5.1 Add : Press [+] to add new device on apps.

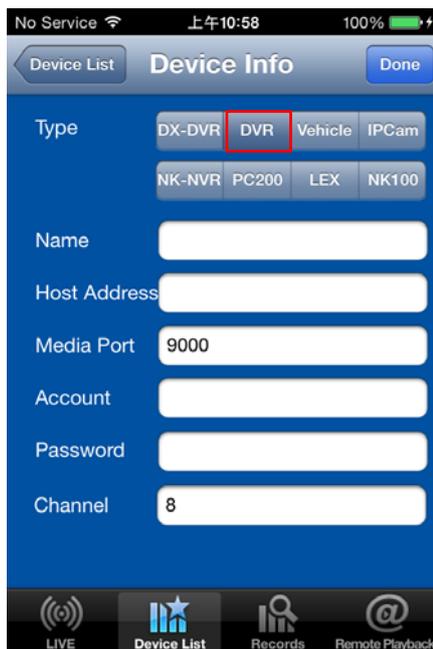

2.5.1.1 Add DX-DVR series to apps.

1. Name : Assign a remark name for the device.
2. Host Address : Key in the device IP address or Domain name.
3. Media Port : Key in DX-DVR media port. Default: 34567
4. Account : key in User name of DX-DVR. Default user name: admin.
5. Password: key in password of DX-DVR, please keep blank if there' s no password.

Press DONE to finish the setting.

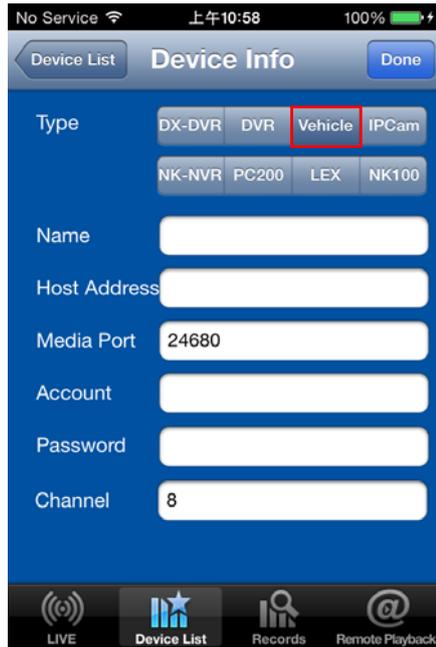

2.5.1.2 Add DVR device

1. Name : Assign a remark name for the device.
2. Host Address : Key in the device IP address or Domain name.
3. Media Port : Key in DVR media port. Default: 9000
4. Account : key in User name of DVR. Default user name: admin.
5. Password: key in password of DVR, please keep blank if there' s no password.

Press DONE to finish the setting.

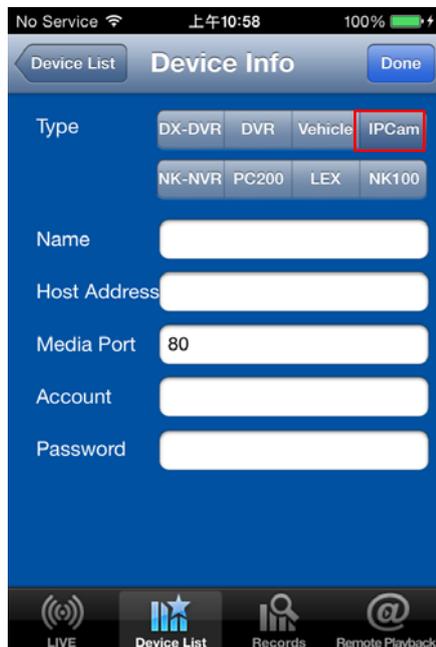

2.5.1.3 Add 3G MDVR to Vacron Viewer

1. Name : Assign a remark name for the device.
2. Host Address : Key in the IP address or Domain name of 3G server. (ex. Taipei 3G Server Domain Name : taipei3g.mobilekore.com)
3. Media Port : Key in DVR media port. Default: 24680
4. Account : key in User name of 3G server. (ex: Demo bus).
5. Password: key in password of 3G server, please keep blank if there' s no password.

Press DONE to finish the setting.

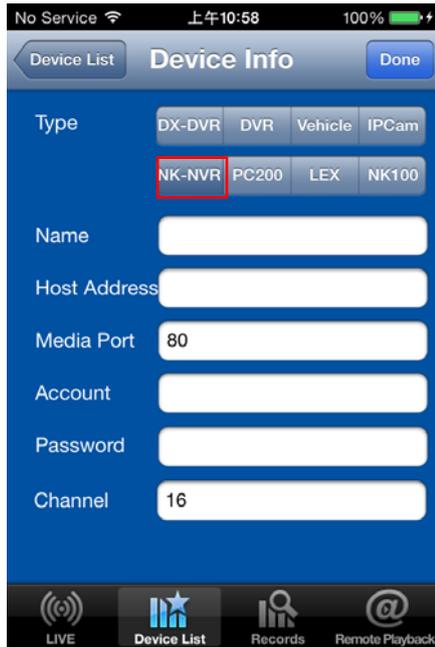

2.5.1.4 Add IP Camera to Vacon Viewer

1. Name : Assign a remark name for the device.
2. Host Address : Key in the IP address or Domain name.
3. Media Port : Key in IP camera media port. Default: 80
4. Account : key in User name of IP camera, default user name: admin.
5. Password: key in password of IP camera, please keep blank if there' s no password.

Press DONE to complete the setting.

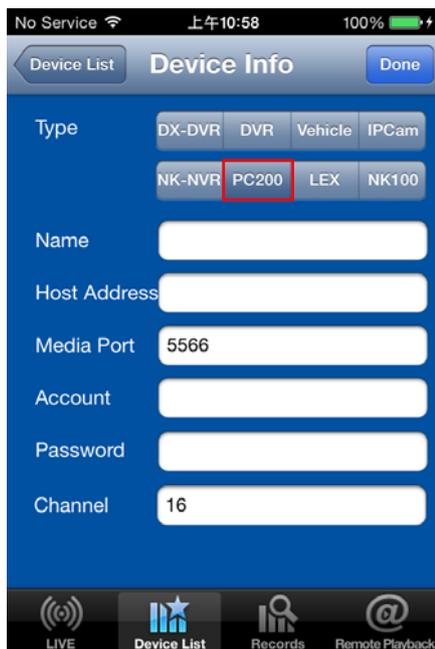

2.5.1.5 Add IP Camera to Vacon Viewer

1. Name : Assign a remark name for the device.
2. Host Address : Key in the IP address or Domain name.
3. Media Port : Key in NVR media port. Default: 8080
4. Account : key in User name of NVR, default user name: admin.
5. Password: key in password of NVR, please keep blank if there' s no password.

Press DONE to complete the setting.

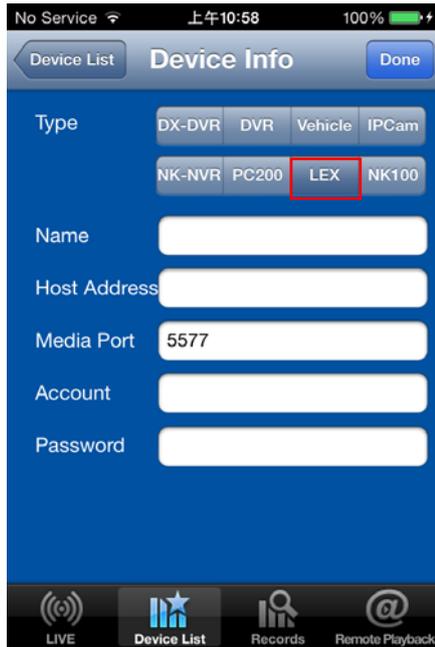

2.5.1.6 Add NVR PC200 to Vacron Viewer

1. Name : Assign a remark name for the device.
2. Host Address : Key in the IP address or Domain name.
3. Media Port : Key in NVR media port. Default: 5566
4. Account : key in User name of NVR, default user name: admin.
5. Password: key in password of NVR, please keep blank if there' s no password.

Press DONE to complete the setting.

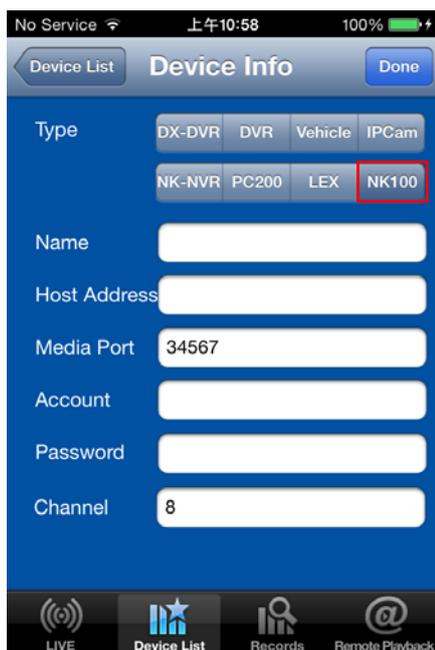

2.5.1.7 Add LEX to Vacron Viewer :

1. Name : Assign a remark name for the device.
2. Host Address : Key in the IP address or Domain name.
3. Media Port : Key in NVR media port. Default: 5577
4. Account : key in User name of NVR, default user name: admin.
5. Password: key in password of NVR, please keep blank if there' s no password.

Press DONE to complete the setting.

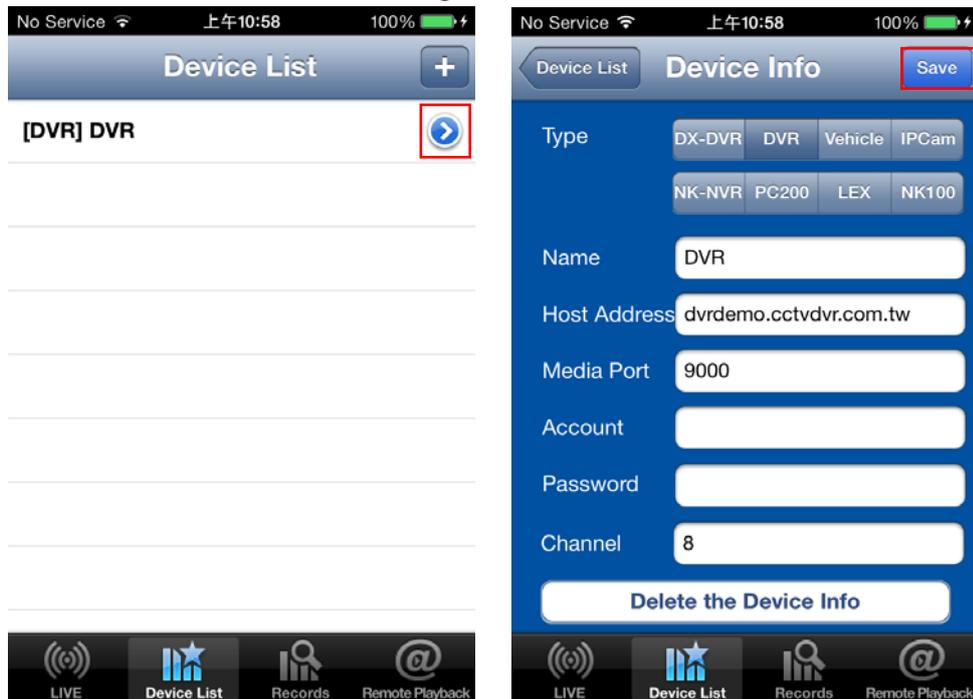

2.5.1.8 Add NK100 to Vacron Viewer

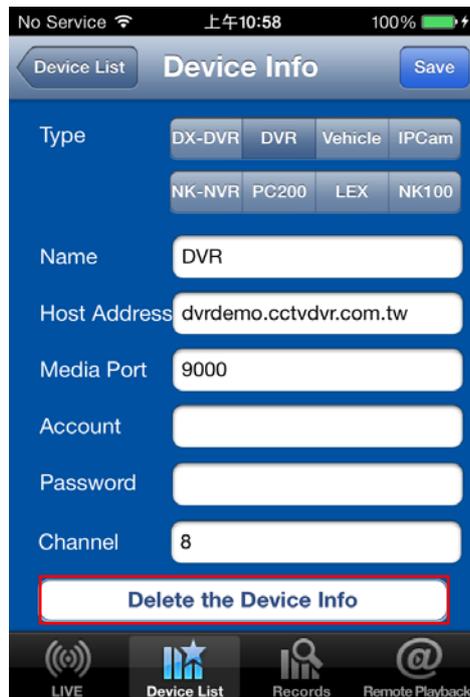

1. Name : Assign a remark name for the device.
2. Host Address: Key in the IP address or Domain name.
3. Media Port : Key in NVR media port. Default: 34567
4. Account: key in User name of NVR, default user name: (blank).
5. Password: key in password of NVR, keep blank if user doesn' t set a password.

Press DONE to complete the setting.

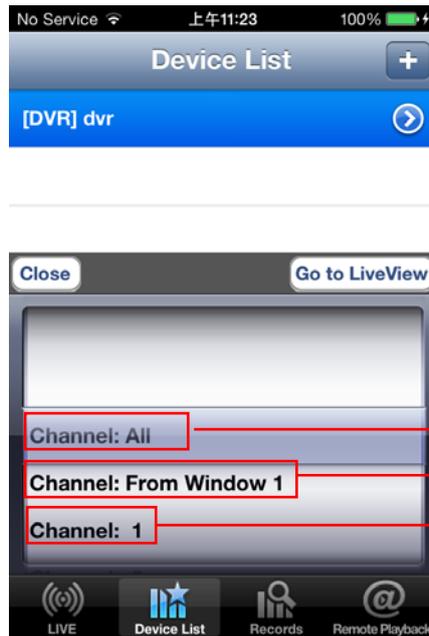

2.5.2 Modification: press  to enter and modify the setting of device. Press SAVE to save the setting of device.

2.5.3 Delete device: Press MODIFICATION to enter the setting, and press [Delete the Device Info] bottom to delete the device from Vacron Viewer.

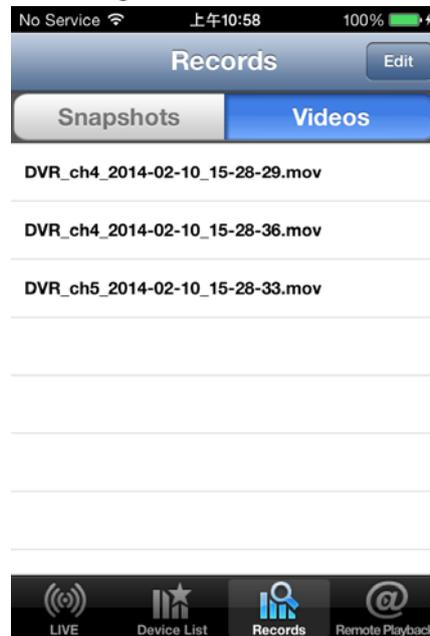

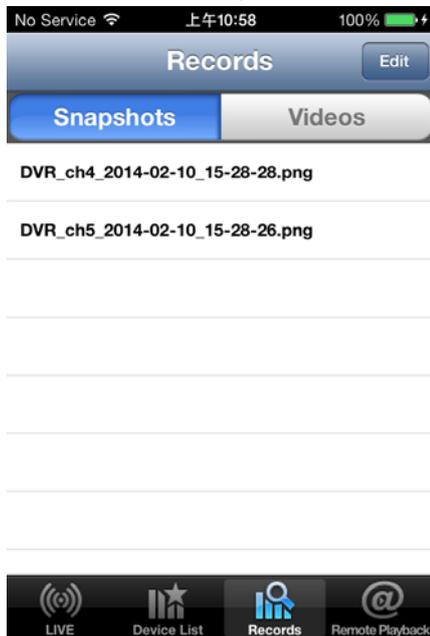

2.5.4 Live view: choose Device from Device List to see live view of the device.

- All Channels: To add all channels to the real-time video images, sorted in order from the beginning of the focus position.
- All Channels (Ch1 begins): No matter where the focus position is, all sorted in order beginning from Ch1
- Only adding single channel to the focus position

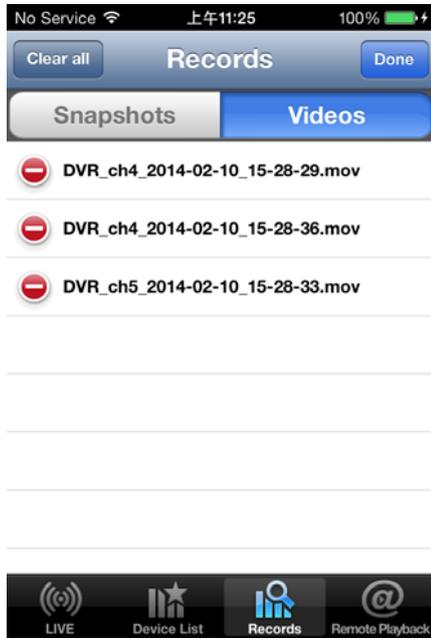

2.6 Record

user can do snapshot and do recording, and find the records here.

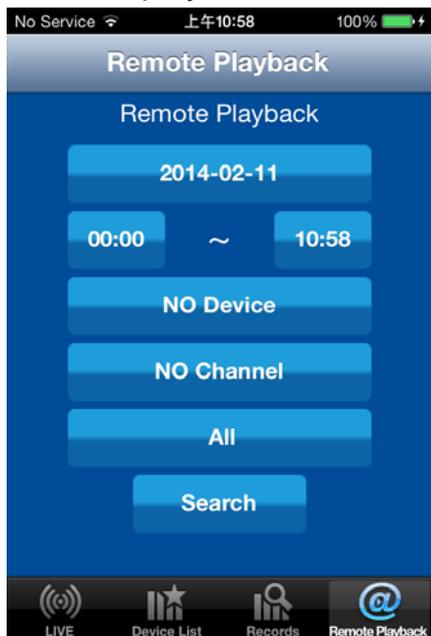

2.7 Delete saved records

Click on the top right "Edit", "Clear All" and the deletable video image and clips next to each video.

2.8 Remote Play Back

User can playback video on DX-DVR remotely.
