Vehicle Video Recorder

User Manual

2019 JULY V1.0

Safety Precautions

Please Take and review some testing videos initially to make sure the images were recorded correctly.

Please note that manufacturer, its subsidiaries and affiliates, and its distributors are not liable for consequential damages arising from any malfunction of main device accessory, including memory device that results in the failure of an image to be recorded or to be recorded in a way that is machine readable.

Before using the product, please ensure that you read the safety precautions described below. Always ensure that the product is used correctly.

- Use only recommended power sources.
- Do not attempt to disassemble, alter or apply heat to the product.
- DO not apply multi cigarette lighter adapters-Applying such devices will cause unstable power input to damage the vehicle video recorder.
- Please always make sure all power connectors are fully secured.
- Avoid dropping or subjecting the product to severe impacts.
- To avoid the risk of injury, do not touch the interior of the product if it has been dropped or otherwise damaged.
- Stop using the product immediately if it emits smoke, a strange smell, or otherwise behaves abnormally.
- Do not use organic solvents such as alcohol, benzene, or thinner to clean the product.

- Do not let the product come into contact with water (e.g. sea water) or other liquids.
- Do not allow liquids or foreign objects to enter the VVR.
- Do not place the VVR near or in direct flame.
- Do not handle the power cord with wet hands.
- Do not use the equipment in a manner that exceeds the rated capacity of the electrical outlet or wiring accessories.
- Do not use if the power cord or plug are damaged, or not fully plugged into the outlet.
- Do not allow dirt or metal objects (such as pins or keys) to contact the terminals or plug.
- Avoid using, placing or storing the product in the humid or dusty areas.

A. ACCESSORIES

Please review the contents prior to use. Please contact yourlocal dealer if something not found in the box.Storage card is not included in the box as free provision.

Standard

Cigarette Lighter Adapter Bracket Monitor Mount (3M double sided tape included) Quick User Guide 16GB SMART CARD CD Rom Optional SD Card USB Reader IR Remote Controller

B. FEATURE DESCRIPTION

- FullHD 1080P, H.264, real-time recording.
- 120° wide-angle 5MP sensor.
- 2.5″ TFT LCD.
- Share of performance as the entire SD card.
- Records video and audio of a car around.
- SDHC Card in Use, Class 10 or above 8GB at least, max to 128GB.
- Loop recording / on start recording.
- Manual Record Events Not Overwritten.
- G-Sensor Built in Crash Event Saved Securely.
- Build-in super-capacitor to offer extra 3-second recording after car stopping supplying power and ensure the video is well stored.
- Zoom IN/OUT by mouse wheel on Carbox player.
- Enhanced night view capacity to offer clear image even when under low-light environment.

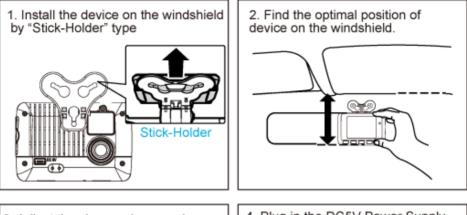

C. SPECIFICATIONS

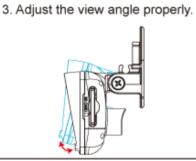

Item	Description				
Sensor	SONY CMOS Sensor				
Resolution	FullHD 1080p Resolution				
	NTSC 1080P 30FPS / PAL 1080P 25FPS				
Power Supply	DC5V±5% / 1 Amp.				
Tower Supply	Build-in 1.5F super-capacitor.				
Operating Tmp.	-10°C~ +60°C				
Storago	SDHC Card Recommended Class 10 or above				
Storage	8GB at least, max to 128GB.				
Pocording	Start recording automatically when power up,				
Recording	extensional 3 seconds recording after power off.				
Recording Data	Date/Time/Video/Audio/G-Sensor				
Diaviaask	Playing on LCD screen.				
Playback	Or Playback the video files on PC.				
Audio Input	Built-in microphone				
Time setting	Time Setup by OSD Menu.				
G-Sensor	Built-in 3D G-Sensor

2.	might be varied with firmware update.	
	Please refer to the SD card usage and life	
	limit, and check video recording periodically	
	with Carbox player on PC to ensure normal	
3.	recording.	
	Please replace build-in battery CR1220 for	
	clock memory when time is not calibrated.	
	2.	

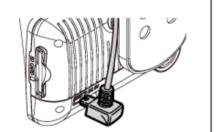

* Specifications shall be changed subject to necessary update.

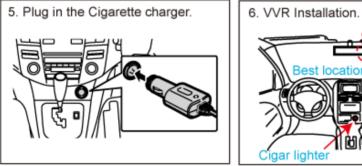

D. INSTALLATION

4. Plug in the DC5V Power Supply.

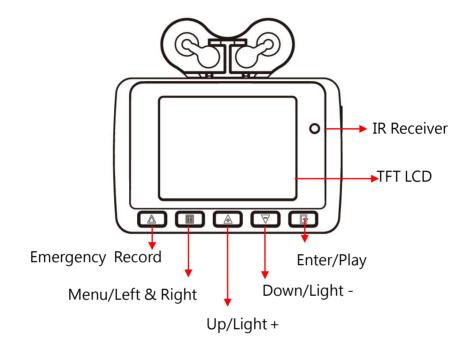

Best location

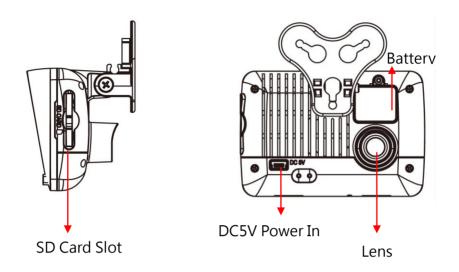

Notice

- (a) This device should be installed on the windshield of clean and dry.
- (b) The best location must be in the range of the moving wipes.
- (c) Format the memory card in the DVR prior the very first recording.
- (d) Set time zone and timing on OSD.

E. CONTROL PANEL / FUNCTION BOARD

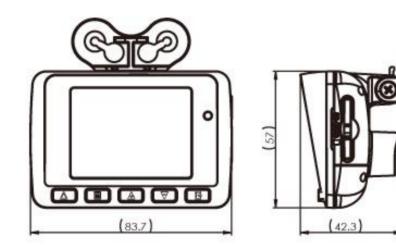

- Emergency Record is a priority button. Whenever Emergency Record occurs record status comes up to the screen.
- LED indicators
 Red: Under normal operation-recording
 Fast Blinking Red: Force recording
 Green : Low light indicator

Size of VVR

unit : mm

F. SD CARD INSTALLATION

- (1). Recommended Class 10 or above 8GB at least, up to 128GB.
- (2). If the memory card is not formatted by the player, the device will automatically erase all the data.
- (3). Please DO NOT use micro SD card adaptor. The adaptor could cause recording stability.
- (4). Memory card has its limit on written times. It is suggested to check SD card files with PC player Carbox player periodically.

- (5). When the SD card life monitor index is less than 5%, the red light of the device will flash for 10 seconds, and the warning notice will be displayed for 10 seconds on screen. After 10 seconds, it will return to the normal status. When the SD card life monitor index is 0%, the light of the device keeps flashing, and the screen displays the warning notice continuously.
- (6). The SD card may be not compatible to the device due to changes or adjustments in the manufacturing' s process. This device cannot guarantee compatibility with all SD cards which are available in the markets. If there is a possible SD card compatibility problem, please replace the model or brand of SD card.
- (7). In the event of impact and high vibration, it may cause damage to the SD card. It is recommended to check and back up important data regularly.
- (8). When an accident happens, please remove the memory card from the device immediately and set it at writing protection condition to avoid record being over written or tampering.

G. RECORD AND STOP

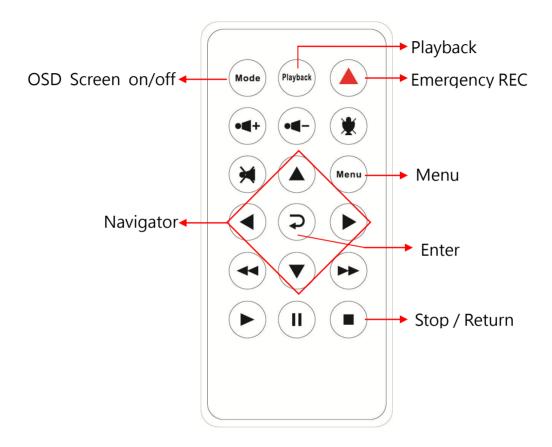

1. Reboot/Record

Reboot the DVR system ready in 20 seconds. DVR starts recording.

2. Power Off/Stop

It stops recording once power is off, build-in capacitor offer 3 seconds extra power to make sure file is well stored. User can remove the memory card after the indication light is off.

H. REMOTE CONTROL (optional)

I. OSD MENU FUNCTION

Select Menu enter OSD as below

- 1. Video standard: click Me to set NTSC or PAL.
- 2. Time setting: click 🗾 to set calendar.
- 3. Monitor setting: click **W** to set Eco-saving mode.
- 4. Microphone: click 💷 to set microphone on or off.
- 5. G-sensor: click adjust the sensitivity of G-sensor.
- 6. Format: click 🔤 to format memory card.

- 7. SD card life monitor : to show current life of SD card.
- 8. Version: click 🚺 to show current firmware version information.

J. PLAYBACK

Click the playback function to enter playback menu, and choose the recorded video fragment.
