1. Multiple- objects tracking

- Magnification: Tracking magnification set up when motion detection activated, the greater number, the higher magnification.
- Symbol will show on the lift upper corner of monitor.

Normal

Multiple-objects tracking on activation

2. Multiple face display

- Sensitivity: human faces detection sensitivity set up, the greater number, and more sensitive (0-11)
- The period of displaying time setting: set the displaying time when function activates, the greater number, the longer display.
- Symbol  will show on upper left corner of monitor.

3. Face auto zoom

- Frame: (ON/OFF) Box up the human faces when human faces are detected .
- Sensitivity : (Value: 0~11) human face detection sensitivity: The higher number, the more sensitive.
- Warning Trigger: Level: (High/Low/Off) Alarm output when human face is detected. Default output port: PIO2.
- Warning Seconds: (Value: 0-65536 /sec) timer of alarm output, when human face is detected.
- Symbol  will be shown on the upper left corner of Live view

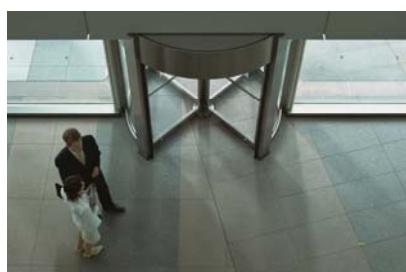

4. Face detection

- Human face detection: ON/OFF
- Frame: (ON/OFF)
 - Box up the human faces when human faces are detected .
- Sensitivity : (Value: 0~11) human face detection sensitivity:
 - The higher number, the more sensitive.
